LOGOTRON
FILER 1295

Filer 1295 is a high-quality, cost-effective database.
It simplifies the storage, selection and recall of information, enabling you to maintain or create mailing lists, inventories or club membership records and to organise any other type of important bulk data.
Filer 1295 allows you to create your own files of up to 10,000 separate records and to recall your information using simple Search and Select functions that can pinpoint and guide you to any particular field within an individual entry.
Because the database is such an important component of any personal productivity system, the Filer has been designed to interface with its two sister programs - Planner 1295 (a spreadsheet) and Writer 1295 (a word processor).

- On screen menus highlight every command
- Up to 10,000 records per file
- Disk management operations available from program
- Search and select on any field
- Record selection based on arithmetic comparison
- Allows easy printing of labels
- Up to 25 characters per key
- Interfaces with Writer 1295 for mail merge
- Interfaces with Planner 1295 for advanced calculation
- Data structure optimises analysis for fast operation
- Allows multiple databases per disk
- On screen help always available
- Comprehensive instructions included

About the Logotron 1295 Series

The Logotron 1295 Series is a family of high-quality, cost-effective business programs that cater for the person who needs to get organised but who has neither the time nor the inclination to struggle with complex computer commands or daunting technical manuals.
The 1295 Series has been formulated with ease-of-use and affordability very much in mind and consists of Writer 1295 (a word processor), Filer 1295 (a database) and Planner 1295 (a spreadsheet).
You can interface the Writer with the Filer to create mass mailshots from stored name and address records, or link Writer with Logotron Planner to incorporate financial spreadsheets into your reports and summaries.
On screen menus provide "at a glance" summaries of the features available with each program, dropping down a further menu of options when a particular feature is selected. Far less time is spent getting to know your way around the program and since each one uses the same command structure, once you've learnt how to use one, you'll have a headstart on getting to know the other two.
Together, or on their own, Logotron Business programs help create a more efficient, more organised business environment, helping you to find time for more important work, without breaking the bank.

ALSO IN THE 1295 SERIES

WRITER 1295

Logotron Writer 1295 embodies all the features of a professional word processor, with full editing facilities that include Insert, Delete, Cut, Paste and Copy.

It allows you to create letters, reports and all forms of written work more quickly, more efficiently and without the need to learn anything more than just a few, simple commands.

The program includes a massive 100,000 word spellchecker; automatic sequence page numbering and the ability to preview your finished document on screen prior to printing.

Writer 1295 has been carefully designed to interface with its two sister programs - Planner 1295 (a spreadsheet) and Filer 1295 (a database) to enable the creation of your own flexible and cost-effective personal management system.

- On screen menus highlight every command
- Features include Insert, Delete, Cut, Paste and Copy
- 100,000 word spellchecker
- Cut and Paste between documents
- Formatting includes margin setting, headers and footers
- Automatic page numbering
- Ability to preview text before printing
- On screen help always available
- Linked text for longer documents
- Supports enhanced printing like bold and underline
- Interfaces with Filer 1295 and Planner 1295
- Comprehensive instructions included

PLANNER 1295

Planner 1295 allows access to all the professional features of an electronic spreadsheet, without the need to learn complicated computer commands.

It has been designed to be simple to use and very cost-effective, but doesn't sacrifice the quality of features that allow the preparation of expense reports; financial statements; tax calculations and all manner of day to day money-based applications.

Rows and columns can be copied, moved, inserted and deleted at will, within a program large enough to provide more than 50,000 individual cell locations.

Once stored, your information is easily interfaced with either of the Planner's sister programs - the Writer 1295 (a word processor) or Filer 1295 (a database) thus enabling you to build an extensive computer-based personal management system.

- On screen menus
- 50,000 cell locations
- 12 digit precision
- Extensive arithmetic functions
- On screen help always available
- Supports industry standard DIF files
- Includes six working templates
- Variable column width
- Interfaces with Filer 1295 and Writer 1295
- Cut and Paste between spreadsheets
- Fixed decimal, percent and bar chart formats
- Comprehensive instructions included

It will help us to provide a better service to our customers in the future if you could complete and return this freepost card. Thank you for your cooperation.
